RAVEN STUDIOS, LLC

CAPABILITY STATEMENT / PUBLIC SECTOR TECHNOLOGY

Texas-based | Established 2008 | U.S.-based engineering resources

Raven Studios delivers custom software, legacy modernization, enterprise integration and intelligent automation. We offer project delivery, ongoing application support and IT staff augmentation for Texas agencies, ISDs, cities, counties and prime contractors.

CORE COMPETENCIES

- Custom .NET, web and mobile application development
- Legacy modernization, Microsoft Access conversion and cloud migration
- SQL Server, database conversion and API integration
- AI-enabled applications and workflow automation
- Software maintenance, QA and IT staff augmentation

SELECTED COMMERCIAL PAST PERFORMANCE

Move-N Software | Senior-living healthcare Converted Microsoft Access to ASP.NET MVC and SQL Server. Current scope includes Azure backup for 77 production databases, 15-minute log backups, .NET 10 modernization and AI-enabled analytics.

Hartman Development | Property management (2026–present) Integrated leasing intake, approvals, e-signature, QuickBooks invoicing and building access; manages 55+ additional workflows.

Wellness technology platform Developed conversational AI, tone and crisis-risk detection, mood tracking and clinician-facing tools using React and Firebase.

FOUNDER / KEY PERSONNEL EXPERIENCE

Brian Foster | 27 years in software engineering. B.S., Computer Science, Jackson State University (1999); Kentico 11 Certified Developer (2019).

Financial services Led AI-enabled IAM self-service portal development at a major U.S. financial services company using Python agents, Java MCP tools and RAG.

Healthcare 10+ years across Move-N engagements; cut build and release times 50% through Azure DevOps CI/CD automation.

K-12 education Built PowerSchool, Clever and Google SSO integrations and attendance systems.

Defense Early-career software engineering at a major U.S. defense contractor.

DIFFERENTIATORS

- Established Texas business since 2008
- Founder-led architecture and delivery
- Legacy Microsoft stack modernization
- Access to U.S.-based engineering resources
- Regulated financial and healthcare experience
- K-12 integration experience
- Flexible capacity for project delivery
- Prime and subcontract teaming
